Bushcraft
Social Story

Bushcraft

During bushcraft, we will learn how fires are made safely and develop lots of other different skills. We may even get to toast some marshmallows!

Bushcraft

I will need to wear clothes that I don't mind getting dirty or smelling of smoke.

I might need to help my instructor carry some equipment for the session.

Bushcraft

My instructor will tell me how to stay safe during the session.

It is important that I listen carefully.

I will learn lots of different skills, this may include fire lighting.

Bushcraft

If I don't feel comfortable lighting a fire, then I can tell my instructor.

If I manage to light a fire, I will smell the smoke and feel the heat.

I must always keep away from the fire unless my instructor tells me.

Bushcraft

During the session, I will feel different textures, like sticks, branches and cotton wool. I might get sticky fingers if we get to make some food.

I might cook some food over the fire, like marshmallows or popcorn.

Bushcraft

Once we finish the session, my instructor will put out the fires.

I will have to help clear the equipment away.

It's a great achievement to be involved in the session.
