Pond Dipping
Social Story

Pond Dipping

Pond dipping is a chance to explore the pond and discover some of the creatures that live there. Using a tray and a net, I can carefully look at what I find while learning about nature.

Pond Dipping

I will walk to the pond with my group.

I may need to help my instructor carry equipment.

My instructor will tell me how to stay safe during the activity.

Pond Dipping

My instructor will fill my tray with pond water.

I can take turns with my group dipping a net into the pond.

I will need to kneel down on the platform, so I don't fall in.

Pond Dipping

I will carry my net and empty it into the tray.

I can use a magnifying glass to look for pond life.

I can use an identification sheet to learn what pond life I have found.

Pond Dipping

My instructor will empty my tray into the pond at the end of the activity.

I will help my group take the equipment back to the stores.

It's a great achievement to be involved in the session.
