Shelter Building
Social Story

Shelter Building

During shelter building, we will work together to build shelters which are strong, waterproof, sustainable and warm. We may even test our shelters at the end to see how well they work.

Shelter Building

I will need to wear clothes that I don't mind getting dirty.

My instructor will tell me how to stay safe during the session.

It is important that I listen carefully.

Shelter Building

My instructor will give me some equipment I can build my shelter with.

I can use the natural materials around us to help.

I will need to work as a part of a team. I can share my ideas but also listen to other people's.

Shelter Building

Once we have finished making our shelters, we may test them with a *White Hall Hurricane*!

I will have to help clear the equipment away.

It's a great achievement to be involved in the session.
